

## PROHIBITS START CAMPAIGN SOON

Maintenance of Federal Law is  
Keynote of Presidential  
Campaign of Drys

(By Associated Press)  
CHICAGO, Sept. 8.—Maintenance of the federal prohibition law is the keynote of the prohibition party's presidential campaign, W. G. Calderwood, prohibition campaign manager, said here today, discussing the issues as viewed by his party.

"The position of the party in this campaign," Mr. Calderwood said, "is that the prohibition party is needed in the failure of the major parties to take any stand on the prohibition question."

"Next to prohibition, our candidates will discuss the league of nations. I think we take the best stand of any on this question. We urge immediate ratification of the league treaty together with the covenant. We believe the quickest way to obtain what changes are needed is to get into the league and fix it from the inside, according as experience teaches, rather than stand around theorizing to no effect on the outside and so blocking progress."

## BEARS FRIGHTEN HERDER FROM JOB

(By Associated Press)  
MARYSVILLE, Cal., Sept. 8.—Bears recently caused Manuel Azavetta, sheepherder on the Andrew Robinson ranch in Sierra county, to turn in his resignation and leave recently.

One night, Azavetta reported, he was awakened by a bear which took a quarter of beef from a peg directly over his head. The next day, while he was away, a bear, probably the same bear, entered his cabin and carried away a ham. The following night the bear, accompanied by his mate and several cubs, visited Azavetta and chased him down a canyon. He did not return to the cabin, but left for another post.

## LIFE SAVERS WILL HOLD COMPETITION

(By Associated Press)  
SAN FRANCISCO, Sept. 8.—Life saving teams representing Oakland, Berkeley and San Francisco will participate in the Red Cross life saving corps aquatic meet to be held here on September 17. The meet will be open to both men and women and the events include rescue races, towing races, resuscitation drills, retrieving relay races and competitions in various rescue holds.

## MEETING OF OLD TIMERS PLANNED

Baseball Players of 1870 Will  
Banquet at Chicago On  
October 13

(By Associated Press)  
CHICAGO, Sept. 8.—The fiftieth anniversary of the first professional baseball championship game will be celebrated by the Old Timers' Baseball association at a banquet here October 13. The game was played between the Cincinnati Red Stockings and the Chicago White Stockings October 13, 1870, at the old Dexter driving park in this city. The Cincinnati aggregation went down to defeat, 16 to 3, at the hands of the Chicago team.

This game was practically the beginning of professional baseball, according to Al G. Spink, of Chicago, secretary of the old association.

The Old Timers' Baseball association was organized about a year ago. It takes in persons who played in or who saw the game, and now has about 1000 members. Tom Foley, manager of the old White Stockings team, is a member.

## GOLD BAR EXTENSION TO GET INTO DEEP MINES

Arrangements have been made for the exchange, share for share, of Gold Bar Extension stock for stock of the Deep Mines, a one-cent per share exchange fee to be paid by the Gold Bar Extension company, as was done by the Consolidated for its stockholders when the Deep Mines shares with the exchange fee paid were distributed as a stock dividend.

## GALVESTON HIGH IN EXPORT TRADE

Value of Shipping From Texas  
Port Nearly Doubles in  
Past Year

(By Associated Press)  
WASHINGTON, D. C., Sept. 8.—Galveston, Texas, took second rank among ports of the United States in the value of exports during the fiscal year ended last June 30. The total value of its foreign shipments as given by the department of commerce was \$598,239,227, or nearly double those in 1919, and greater by three times than those in 1918.

Nearly half of all the exports from the whole country were sent out of New York, the value being \$3,383,638,588, or \$180,000,000 greater than the exports the year before and nearly \$1,000,000,000 more than those in 1918.

New Orleans ranked third with a total of \$589,409,222, or \$100,000,000 more than during the year before. Philadelphia was fourth with \$449,691,705, or \$40,000,000 less than the year before. Baltimore was next, with \$338,961,433, or \$24,000,000 more than the year before. Savannah, Ga., ranked next and ahead of Boston with \$311,171,389, or double the 1919 total. Exports from Boston were valued at \$281,614,919, or \$16,000,000 more than the year before.

## ESMERALDA COUNTY NOT REPRESENTED

One county of the state has been without representation at the state board of equalization sessions so far this year, namely Esmeralda. It has been reported that Sheriff and Assessor Ingalls of Esmeralda has been in a San Francisco hospital for treatment and for that reason has been unable to be in Carson for the meeting.

## NOTICE AMERICAN LEGION

The next regular meeting of the Elmer J. Bell post of the American Legion will be held on Wednesday evening, September 8, at 8 o'clock, at the Elks' hall.

# BROKEN HILLS

## TO NEVADA MINING MEN:

Follow me into Broken Hills, Nevada's new silver mining prodigy. Do it now, TODAY.

I believe Broken Hills to be another Tonopah and to embrace all of the possibilities of Tonopah and Goldfield combined.

Broken Hills is probably the biggest mining discovery which has been made in the battle-born state since the birth of Comstock.

The already proved high-grade ore zone of Broken Hills district is fully two miles long and a mile wide.

In one sector, surface trenches and shafts have proved a compact area, ONE THOUSAND FEET WIDE, to be mineralized all the way. These trenches have not been run on the strike of the ore occurrences but across them.

Think what this means and marvel.

In the main Broken Hills property—the "discovery" mine—more than four hundred (400) tons of ore, "high-graded" by two prospectors at shallow levels from a strong vein, nine feet wide in places, have averaged better than 130 ounces of silver per ton, as settled for in cash by the Western Ore Purchasing Company. A late shipment of 30 tons averaged 233 ounces of silver per ton.

The sulphide zone in the mine was reached at depth of 130 feet. In the north drift on the 150-foot level, a sample ACROSS NINE FEET of the vein, taken at two points, gave returns of \$17.60 a ton and \$24 a ton in silver, respectively.

Nine feet of silver sulphide ore averaging from \$17.60 a ton to \$24 a ton is a real mine in any man's country.

Since these disclosures, the property, under aggressive development by the Broken Hills Silver Corporation, has wrought one sensation after another.

At 12 feet below the 150-foot level in the main shaft, 2½ feet of the vein, along the hanging wall section—all that was accessible—the vein dipping out of the shaft there—assayed \$47.60 in silver a ton.

At a depth of 175 feet in the main shaft—where the vein continued to dip out of the shaft—a sample across 2½ feet of the exposed part of the hanging wall section of the vein, officially taken by A. P. Thompson, consulting geologist and engineer, gave returns of \$110.84 per ton. The ore content is 89.60 ounces silver and 11.80 per cent lead per ton. At a depth of 193 feet in the main shaft, the vein has just been crosscut and is found to be NINE FEET WIDE.

Now, this bonanza vein has been proved over a horizontal length of fully 600 feet by shafts, and other underground workings, and for an additional 1,300 feet by surface trenches.

There are 25 miners now engaged in opening it up. Present plans call for 40 to 50 miners within the next 30 days, in a concentrated effort to obtain depth in the main shaft and to prove the orebody at depth on the strike of the vein, north and south.

Search the annals of Far Western Mining History and match the speculative possibilities of this orebody, if you can.

According to the Engineering and Mining Journal of New York, F. C. Schrader, of the United States Geological Survey, who early in June examined the showing down to the 150-foot level, expressed the opinion that the indications at that depth were VERY FAVORABLE.

That is strong language for Mr. Schrader to use in the early period of any mine's development.

Governor Emmet D. Boyle, who examined the mine at about the same time, said over his own signature, "It is THE BEST showing I have seen in any new territory in Nevada for many years." Nevada's Chief Executive stands high as a mining engineer and is known to "lean backwards" in his conservatism.

Arthur Perry Thompson, famed as an engineer of the great United Verde Copper Company, and as a geologist of the Anaconda Copper Mining Company, the Davis-Daly Copper Mining Company, the Utah-Apex Mining Company and others, stated last week officially as consulting engineer and geologist of the Broken Hills Silver Corporation, AFTER the main shaft had reached A DEPTH OF 175 FEET, that he believed future developments "would be found to exceed anything yet claimed for the property."

Space does not permit iteration of the scores of encomiums which have come from the lips of experts who have recently examined the property.

Now the main vein—rich and strong as it is—by no means tells the story of recent mine progress of the Broken Hills Silver Corporation.

Five hundred feet to the EAST of the main vein, a rich cross fissure has been sunk on to a depth of 90 feet and drifted on for 200 feet. It carries high grade ore all the way, assaying from \$50 per ton upward. The ore is described by experts as the best showing of solid galena seen in years. The face of the east drift, when assayed last week, gave a return of \$321 per ton across ten inches. Future developments at depth in this EASTERN section of the property are BIG WITH PROMISE.

About 5,000 feet SOUTHEAST of the main Broken Hills shaft and within 200 feet of the southernmost point of the Broken Hills group, there has been opened on an adjoining property at depth an orebody that is reported on high authority to assay at several points in the shaft in the hundreds of dollars per ton.

Approximately a mile SOUTHWEST of the main Broken Hills shaft, a brecciated ore zone has been opened by trenches on the surface, showing mineralization over the width of fully two mining claims—a distance of 1,200 feet. Ore assaying from \$60 to \$100 per ton has been obtained in "prospecting" shafts here.

What is the answer? Is it not that a promising new bonanza silver camp has been born, the like of which, at so early a period in its development, has no prototype in Nevada mining history.

# Broken Hills

San Francisco Stock Exchange

25 Bid, 26 Asked

## TO INVESTORS:

Buy Broken Hills Silver Corporation stock, now listed on the San Francisco Stock Exchange, quoted today at 25c bid, 26c asked. DO IT WITH BOTH HANDS.

The stock is, in my opinion the one best speculative purchase on the whole list of cents-per-share mining securities traded in ANYWHERE.

The stock represents the "discovery" mine of what may become the greatest Bonanza silver mining district since the days of the Comstock.

Tonopah Mining Company shares advanced from 50c to \$23 per share in the early part of the Company's career. Tonopah Extension shares rose from 15c to \$13 per share. Goldfield Mohawk stock jumped from 10c to \$20 per share, and a host of others, purchased in the pre-boom days of newly discovered Nevada bonanza camps, multiplied in stock market value many hundreds and thousands per cent.

I predict for Broken Hills stock a record-breaking, hair-raising, country-wide market career of the kind which marked the boom days of Goldfield. Buy the stock NOW, at the BEGINNING.

BUY BROKEN HILLS. Order the stock transferred into your own name, and hold it pending complete mine development.
